

Rego Park Counseling — Consolidated Wiki

Sep 29, 2026 · @jhonatan

Everything the team has shared about Rego Park Counseling in one place: the client, the rules, the SEO findings, the content plan and the website decisions made so far. The ClickUp wiki stays the source of truth; this is the working summary.

Client at a glance

Rego Park Counseling is an outpatient mental health and substance use clinic in Queens, mostly serving Medicaid patients who live nearby; it signed with Elev8 on Sept 15, 2026.

Topic	What we know
Owner and decision maker	Emmanuel
Locations	Rego Park (main) · Fresh Meadows / Flushing (needs inquiries, especially mental health) · Yonkers (not open yet, listed from day one)
Addresses on the current site	63-36 99th Street, Queens, NY 11374 · Parsons Boulevard, Fresh Meadows, NY 11365 (current site shows "7182"; confirm exact format)
Phone	(718) 459-2558 (to become CTM tracking numbers)
Licenses	OASAS (substance use) and OMH (mental health)
Level of care	Outpatient only. No inpatient, no detox. IOP not confirmed
Programs	CORE (HARP-eligible Medicaid members), Social Care Network, DUI/DWI evaluations, dual diagnosis, elderly care, telehealth
Patients	70 to 80% Medicaid. Every plan except Healthfirst. Local: Rego Park, Fresh Meadows, Flushing; they will not travel far
Separate business	Primary care company, Rego Park Diagnostic and Treatment Center: own website, do not merge. MAT sits there

Topic	What we know
Reviews	3.2 stars from 20 Google reviews, some meant for the Jewish Board center
What Emmanuel asked for	Short, scannable pages (he hates long text), a clear callback form, real team photos, existing logo kept, style choices shown to him for approval
Contract deadline	30 days from Sept 15 signing (around Oct 15, 2026)

Elev8 team: Julian Bejarano (client lead) · Maria Rojas (PM) · Jhonatan Ramirez (website build) · Pavel Goriakin (content) · Cristofer (local SEO) · Luis Rodríguez (reporting, Semrush) · Elizabeth Navas.

Build rules and brand safety

These rules apply to every page, post and profile; the ones marked "until confirmed" change only when Julian gets an answer from Emmanuel.

Rule	Detail
Outpatient only	No inpatient, detox or residential claims
IOP	Do not claim until confirmed. The current homepage says "intensive outpatient"; drop it
MAT, Suboxone, Vivitrol	Never offered on this site. MAT belongs to the primary care company
Psychiatry, couples counseling	Until confirmed
Spelling	OASAS, never OASIS
Insurance	Never name which plans are accepted (Healthfirst is not). "Most Medicaid plans" is fine
DWI content	Information, not legal advice
Brand separation	The Jewish Board's Rego Park Counseling Center (97-77 Queens Blvd) gets confused with RPC and ranks #3 and #8 for Rego Park searches. Nothing may blur the two; separate their reviews and listings from ours

Rule	Detail
Primary care company	Separate website; do not merge
Design	Short scannable pages, clear callback form, real photos, existing logo, styles approved by Emmanuel
Blog URLs	Every post keeps its root-level URL or gets a one-to-one 301. New posts use the same root-level style

Competitors and where Rego Park stands

Authority is not the problem: Rego Park is invisible in the local map packs and missing the local and service pages its main competitor has. Built from 12 Google searches set to Queens and Yonkers, Search Console, Semrush and Emmanuel's input.

Competitor	Where	Why they matter
Bleuler Psychotherapy Center	Forest Hills, next door	OMH and OASAS licensed, Medicaid, a dedicated Queens page per service. Strongest on almost every Queens therapy search
Forge Health	Rego Park	Barely ranks organically; competes through listings
Jewish Board's Rego Park Counseling Center	97-77 Queens Blvd	The similarly named center behind the review mix-ups; ranks #3 and #8 for Rego Park searches
Long Island Consultation Center	Elmhurst	In the map pack for DWI evaluations
Cornerstone	Fresh Meadows	Top of the map pack for outpatient substance use; 4.1 stars from 208 reviews

Findings

- Authority at parity: Rego Park 26 authority / 519 referring domains vs Bleuler 26 / 479.
- Missing from nearly every Queens map pack except substance abuse evaluations (#1) and DWI evaluations (#2). Fresh Meadows appears in none.

- Evaluation traffic is national, not local; the blog ranks against out-of-state providers and is slipping (#6–9 down to #14–15).
- Pages Bleuler has and RPC does not: psychiatry, "mental health clinic in Queens" (RPC #41), New York DWI evaluation, Medicaid, CORE, LGBTQ+.
- Fastest wins: a Google profile for Fresh Meadows and more reviews.

Technical baseline and must-survive items

The new site fixes almost everything technical on its own; what it will not fix is protecting the blog URLs, rebuilding clean after the spam injection, and not breaking email at the DNS cutover.

Before snapshot (to compare after launch)

Metric	Value
Search Console, Jul 1 – Sep 23, 2026	8,601 clicks · 1.34M impressions · 0.64% CTR (history starts in July)
Mobile PageSpeed	53 to 55
Main content load (lab) / real users	14 to 17 s / 3.2 s
Crawl issues	130 noindex pages · 218 multiple H1s · 133 duplicate titles · 147 missing descriptions · no clinic schema
Share of clicks from blog posts	About 95%

8 items that must survive the rebuild (used as launch QA; the old URL list is re-crawled on launch day)

1. Keep every blog post at its current root-level URL, or 301 it one to one. The "URLs to Preserve" tab lists all 599.
2. Redirect all 689 URLs Google knows, including 169 non-www copies.
3. Move content only, not the old WordPress database, plugins or theme. 95 injected casino and betting pages were indexed since July (all 404 now).
4. Return 410 for the spam URLs; check Security Issues and Manual Actions in Search Console.
5. At the GoDaddy cutover change only the website records. Email runs through enGuard and Microsoft 365: do not touch MX, SPF or TXT.

6. Find the owner of services.regoparkcounseling.com (indexed, 403, another server). Julian asks Emmanuel or Thrive.
7. After launch, remove the old sitemaps in Search Console and submit the new one.
8. Keep GTM-T3S8L3WL and GA4 property 320939576 through launch; retire the empty second GA4 property.

Google profiles should point to the www address once the new site is live.

Q4 2026 SEO strategy: local first

Make each location visible where people choose a clinic near home, rebuild the site for three locations, and give every admission a source. One goal: more admissions near each location, starting with Fresh Meadows mental health.

Already delivered since Sept 15: wiki from every meeting · analytics, Tag Manager, Search Console, WordPress and GoDaddy access · competitor benchmark · technical baseline (599 URLs to keep, 95 spam URLs to clear) · six-month content plan.

Month	Work
October	Call tracking live, site built and launched, Fresh Meadows Google profile, categories and products on every profile, review program
November	Listings and health plan directories, referral partner outreach, first local rank report
December	Yonkers profile and page at opening, first full month of tracked admissions

Owner	Responsibility
Julian	Walk Emmanuel through the plan. Asks: CTM Marketing Pro purchase, admissions rating every first-time call, photos, staff languages, Medicaid plans per location, Yonkers address and opening date
Maria	Local SEO Plan and Tracking Plan tabs are task lists with timing; October is heavy

Owner	Responsibility
Jhonatan	New Site Scope tab is the build checklist: one page per location, program pages, clinic schema per location, forms into CTM with source, clean install, DNS switch without touching email
Cristofer	Fresh Meadows profile now; categories (Addiction treatment center first for Rego Park, Mental health clinic first for Fresh Meadows, confirm against live profiles); products linked to program pages; review program; directories and health plan listings; weekly posts; Yonkers at opening
Pavel	Content plan feeds the profiles: each new post becomes a weekly profile post for its location

Keyword tracking set

81 unique keywords are tracked in Semrush project 31374208, tagged t1 (commercial), t2 (services and neighborhoods), t3 (informational), brand, plus cluster.

- **How the set was built:** what RPC already ranks for (Queens therapy, anxiety and depression counseling, evaluations); commercial clusters the new site must own (mental health clinic, psychiatry, Medicaid, substance use, DWI, CORE, telehealth); neighborhood terms per location; five informational terms from the content plan; brand terms to watch the Jewish Board center.
- **Top 3 today:** counselors in queens, best counselors in queens, counseling for adults queens; #1 anxiety counseling queens.
- **Close:** therapist in queens (#4), therapist queens ny (#5), therapist queens (#6), anxiety therapy queens (#6).
- **Not ranking yet:** psychiatry, the Medicaid page terms, every Fresh Meadows and Yonkers neighborhood term.
- **For the build:** the Keyword Mapping tab assigns each keyword to one page; every Tier 1 term gets exactly one page in the sitemap.

Content plan, Oct 2026 – Mar 2027

Pages win the commercial searches (Medicaid, evaluations, Queens therapy); the blog answers the questions people ask before they call, in New York terms, and every post links up to a page. 12 new posts (1st and 3rd Monday) and 12 optimizations (1st and 3rd Wednesday).

- October and November optimizations go straight into the new site, since the rebuild lands in October.
- Maria creates 24 tasks, 4 a month. The sheet has one row per piece: keyword, H1, related keywords, brief, word count, supported page, compliance column.
- Four posts depend on answers from Emmanuel: who authors and reviews clinical posts, whether psychiatry and medication for addiction are offered, whether couples counseling is real.

- Medicaid transportation and location posts link to the location pages; new posts are shared on the Google profiles.

Build decisions made so far

The sitemap, redirect map, design brief and home page brief are done; blog pruning is deliberately left for last.

Decision	Detail	Where it lives
New sitemap	43 pages in 8 sections (Mental Health, Substance Use, Evaluations, Programs, Who We Serve, Therapies, Locations, plus Insurance, About, Contact, Blog, legal). Max two levels deep	RPC_Sitemap_Redirect_Map_v2.xlsx
Redirect map	618 known URLs, one action each: Commercial 65 × 301, 5 kept · Blog 182 kept for now · Cleanup 205 × 301, 132 spam × 410, 28 × 404	RPC_Sitemap_Redirect_Map_v2.xlsx
Anxiety page	/counseling/anxiety-counseling/ 301s to /mental-health/anxiety-counseling/ (keeps #1 for "anxiety counseling queens")	Confirmed by Jhonatan
Evaluation posts	Stay as blog posts and link up to /evaluations/	Confirmed
Weed, Adderall, withdrawal, 12-step posts	Parked for the blog phase	Confirmed
Adolescent page	301 to /substance-use/ (adolescent care not confirmed)	Confirmed

Decision	Detail	Where it lives
Menu redirects	"Communities We Serve" → /locations/; "Treatment Philosophy" → /about/	v2
Header	Logo · 7 items (Mental Health, Substance Use, Evaluations, Programs, Locations, Insurance, About) · phone + Request a Callback	Header & Home Page Brief
Content scope	37 commercial pages to write (34 ready now, 3 pending) + 4 legal pages to review + 1 to 4 author pages	This doc
Templates	11: Home, Hub, Service/Program, Location, Standard page, Blog archive, Single post, Author archive, Header, Footer, 404	This doc
Design direction	Essence "Care close to home" (proposal), three style routes for Emmanuel, real photos, WCAG AA, mobile first	Website Design Brief

Open questions and sources

Most open questions go to Emmanuel through Julian, and several block pages or posts until answered.

Question	Owner	Blocks
Is IOP offered?	Julian	Wording on Substance Use pages
Is psychiatry / medication management offered?	Julian	/mental-health/psychiatry/, posts

Question	Owner	Blocks
Is couples counseling a real service?	Julian	/therapies/couples-therapy/, 2 redirects
Can LGBTQ+ affirming care be featured?	Julian	/who-we-serve/lgbtq-affirming-care/
Who authors and reviews clinical posts?	Julian	Author pages, post template
Yonkers address and opening date	Julian	Yonkers page, schema, Google profile
Staff languages, clinic hours, team photos and credentials	Julian	Home, location and team pages
Which Medicaid plans each location is contracted with (internal only)	Julian	Insurance page wording
CTM Marketing Pro purchase; admissions rating every first-time call	Julian	Tracking
Owner of services.regoparkcounseling.com	Julian	Launch QA
What is /rego/ (1.1k impressions) before it redirects to /programs/core/	Jhonatan	Redirect map
Cross-check the redirect map against the 599-URL "URLs to Preserve" tab	Jhonatan	Blog phase
Keyword Mapping and Page Clusters tabs vs the sitemap's target keywords	Jhonatan	Page briefs
